## Executive Summary

The **/Logistics** folder contains **14 files** accumulated between **June 1 and June 4, 2026**, spanning four file types (CSV, PNG, XML, JSON) across five contributors and one automation. Activity breaks into three distinct streams:

- **Daily shipment reports** — Six CSV files submitted by logistics coordinators Sam Reyes, Priya Nair, and Marcus Hale covering 11 individual shipments totaling **9,560 lbs** of freight.
- **Vendor orders from Brightway Retail** — Three XML purchase orders (0010–0012) routed automatically via the *Copy Partner Uploads To Logistics* automation from the **Inbound/Brightway** staging area on June 2, 3, and 4 respectively.
- **Image assets** — Five PNG images (IMG\_6206–6210, totaling ~754 KB) uploaded by Priya Nair via the Desktop app in two batches on June 4. These are the largest files in the folder by size and have no associated logistics metadata.

The folder also contains **manifest.json** (603 bytes), created by an API key on June 1 as part of the initial folder seeding alongside the first batch of shipment CSVs.

## 4 · Vendor Orders — Brightway Retail

Three XML purchase orders routed by the 'Copy Partner Uploads To Logistics' automation (ID 52610).

Order ID	Partner	Created Date	Submitted By	Line Items	SKUs	Requested Delivery	Ship-to Address
0010	Brightway Retail	Jun 2, 2026	Dana Okafor	2	BR-4003, BR-4004	Jun 17, 2026	1400 Harbor Blvd, Oakland CA 94607
0011	Brightway Retail	Jun 3, 2026	(see XML)	—	—	—	(see XML)
0012	Brightway Retail	Jun 4, 2026	(see XML)	—	—	—	(see XML)

**Automation detail:** Orders 0011 and 0012 were copied from *Inbound/Brightway* by automation **#52610 — Copy Partner Uploads To Logistics**, triggered on file-create. Detailed metadata was only extracted for order 0010; orders 0011 and 0012 contain full data in their XML bodies.

## 5 - Contributor Activity

All users and automated sources that created or last-modified files in /Logistics.

Contributor	Role / Type	Files Created	Files Last-Modified	Upload Method(s)	Last Active
Claudio Tinnirello	Site Admin	0	11	API Key	Jun 4, 2026 17:38 UTC

Dana Okafor	Staff (order submitter)	0	0	—	Jun 5, 2026 12:56 UTC

Note: Claudio Tinnirello's *last-modified* count reflects post-upload metadata writes by his admin API key (#5104899), not direct file edits. Priya Nair's 7 files created includes 5 PNG images uploaded via the Desktop client on June 4.

## 6 - Image Assets (PNG Files)

Five PNG images uploaded by Priya Nair on June 4, 2026 in two rapid batches.

File Name	Size (bytes)	Size (KB)	Uploaded At (UTC)	API Key	Batch
IMG_6206.png	118,582	115.8 KB	2026-06-04 22:44	#5123721	1
IMG_6207.png	126,469	123.5 KB	2026-06-04 22:44	#5123721	1
IMG_6208.png	201,006	196.3 KB	2026-06-04 22:44	#5123721	1
IMG_6209.png	112,728	110.1 KB	2026-06-04 22:49	#5123742	2
IMG_6210.png	194,720	190.2 KB	2026-06-04 22:49	#5123742	2
<b>TOTAL</b>	<b>753,505</b>	<b>735.8 KB</b>			—

The two batches (22:44 and 22:49 UTC) used different API keys (#5123721 and #5123742), suggesting two separate Desktop sessions or sequential API uploads. These images have no logistics-specific metadata and may represent field photos or delivery documentation.

## 7 - Observations & Recommendations

### Image files lack metadata

The five PNG files (IMG\_6206–6210) have no custom metadata linking them to specific shipments or vendor orders. Consider establishing a naming convention or metadata tagging workflow so images can be cross-referenced to the relevant shipment IDs.

### Jun 1 API uploads have no user attribution

Three files (manifest.json, daily-shipments-sam-reyes.csv, daily-shipments-marcus-hale.csv) were created via API key #5105164 with no associated user ID. Ensure API keys used for operational file uploads are attributed to a named service account for audit clarity.

### **Brightway order metadata is inconsistent**

Vendor order 0010 contains full structured metadata (SKUs, delivery date, ship-to address). Orders 0011 and 0012 have no extracted metadata — only raw XML. Extending the automation or adding a post-copy metadata extraction step would make all orders searchable.

### **Rapid PNG batch on Jun 4**

Five images totaling ~754 KB were uploaded in a 5-minute window on Jun 4 via two API keys. This is consistent with a Desktop client batch upload. No action required, but confirming these images belong in /Logistics (vs. a dedicated /Images or /Deliveries path) is advisable.

### **No subfolders**

All 14 files sit flat in /Logistics with no subdirectory structure. As volume grows, organizing by date (e.g. /Logistics/2026-06/) or file type (/Logistics/Shipments/, /Logistics/VendorOrders/) will improve navigation and permission scoping.
